This section displays a comprehensive range of door profile cross-sections. Each profile is shown with its specific dimensions (height, width, and internal cavity widths) and a corresponding part number. The profiles are organized into rows, with some rows showing multiple variations of a single profile type. The part numbers include suffixes like 'Z' for zinc-plated or 'CrNi' for chrome-nickel plated versions. The profiles vary in height from 70 mm to 125 mm and in width from 30 mm to 125 mm. Some profiles are shown in a closed position, while others are shown in an open position to illustrate the internal structure and sealing mechanism.

This section displays a wide variety of door hardware components, including hinges, handles, locks, and seals. Each component is shown with its dimensions and a corresponding part number. The components are organized into rows, with some rows showing multiple variations of a single component type. The part numbers include suffixes like 'CrNi' for chrome-nickel plated versions. The components vary in size and shape, with some being standard and others being custom or specialized. The part numbers are listed below each component, and some components have additional notes or specifications. The components are shown in a perspective view, with some showing the internal structure and others showing the external finish. The part numbers are listed in a grid-like format, with some components having multiple part numbers for different sizes or configurations. The components are organized into rows, with some rows showing multiple variations of a single component type. The part numbers include suffixes like 'CrNi' for chrome-nickel plated versions.
